

# Documentation for Minimalistic Web Design Template

## Overview

The "Minimalistic Web Design" template is a clean and responsive design suitable for personal portfolios, business websites, or informational landing pages. It includes structured HTML, styled CSS, and interactive elements designed to ensure a seamless user experience across devices.

---

## Features

- Responsive Design: Ensures compatibility with desktops, tablets, and mobile devices.
- Structured Sections:
  - Header with navigation links.
  - Hero section with a call-to-action.
  - About section for personal or company information.
  - Services section for showcasing offerings.
  - Contact form with a message box.
  - Footer with branding.
- Modern Styling: Clean layout using CSS, with hover effects and box shadows.
- Customizable Components: Easy to modify HTML structure and CSS styles.

---

## File Structure

project-root/

```
├─ index.html      # Main HTML file
├─ css/
|   └─ bootstrap.min.css # Bootstrap CSS (optional, for faster prototyping)
|   └─ style.css       # Custom CSS for the template
├─ js/
|   └─ bootstrap.bundle.min.js # Bootstrap JS (optional, for interactivity)
├─ images/
|   └─ pr.png         # Placeholder for the About section
└─ README.md         # Documentation file
```

---

## Installation

### 1. Download or Clone:

- Clone the repository using ``git clone <repository-url>``.
- Alternatively, download the ZIP file and extract it to your project folder.

### 2. Open the File:

- Open ``index.html`` in your preferred web browser to preview the template.

### 3. Modify Content:

- Update text, images, and styles to suit your requirements.

---

## Customization Guide

### HTML

- Modify the navigation links in the <header> section to match your site's pages.
- Update the About section image by replacing pr.png in the images/ folder.
- Add or remove services in the Services section by duplicating or deleting <div class="card"> blocks.
- Customize the footer text as required.

## CSS

- General Styling: Located in style.css, controls the appearance of all elements.
- Responsive Behavior: Modify media queries at the bottom of style.css to adjust layout for specific screen sizes.

## JavaScript (Optional)

- Add interactivity using bootstrap.bundle.min.js or include your custom JavaScript files.

---

## Responsive Design

- Desktop: Full-width layout with a maximum content width of 1200px.
- Tablet: Adjusts to two-column layouts where applicable.
- Mobile: Stack elements vertically for optimal readability.

---

## Browser Compatibility

The template is tested on the following browsers:

- Google Chrome
- Mozilla Firefox

- Safari
- Microsoft Edge

---

## Credits

- Bootstrap Framework: For grid system and reusable components.
- Font Family: Default sans-serif (Arial) included in most browsers.
- Images: Placeholder pr.png is for demo purposes.

---
